

BIOSYNC CLINICAL LABORATORY REPORT

Patient: Margaret T. Chen (DOB: 03/14/1942) | Date: January 18, 2026

Vital Signs & Biometric Readings

Heart Rate	88 BPM
Blood Pressure	138/86 mmHg
SpO2	94%
Temperature	99.4°F
Glucose	148 mg/dL
Weight	120 lbs
BMI	22.7
HRV	41 ms

Clinical Notes

Patient presents with complaints of mild fatigue and increased confusion over the past week per caregiver report. Non-smoker. Denies alcohol use. Currently on Metformin 500mg, Lisinopril 10mg, Alendronate 70mg weekly, and Donepezil 5mg. Heart rate at 88 BPM is mildly elevated — patient reports restlessness and poor sleep. Blood pressure at 138/86 mmHg represents Stage 1 hypertension — Lisinopril dose to be reviewed. SpO2 at 94% is concerning given patient age — mild respiratory congestion noted on exam. Temperature at 99.4°F suggests slight fever — viral etiology likely. Glucose at 148 mg/dL is elevated above target range — dietary review initiated. HRV at 41 ms is below average indicating physiological stress. Cognitive function mildly worse than baseline per caregiver observation.

Provider Notes

Increase Lisinopril monitoring — recheck blood pressure in 2 weeks. Dietary counseling provided to caregiver regarding low-sodium, low-glycemic diet. Recommend rest and hydration for mild fever. If temperature exceeds 101°F or confusion worsens, seek urgent care immediately. Cognitive re-evaluation scheduled in 6 weeks. Caregiver Linda Chen counseled on warning signs. Ordering Provider: Dr. Priya Subramaniam, MD. Facility: BioSync Clinical Health Center
