

BIOSYNC CLINICAL LABORATORY REPORT

Patient: Margaret T. Chen (DOB: 03/14/1942) | Date: March 19, 2026

Vital Signs & Biometric Readings

Heart Rate	95 BPM
Blood Pressure	142/90 mmHg
SpO2	93%
Temperature	100.1°F
Glucose	162 mg/dL
Weight	121 lbs
BMI	22.9
HRV	36 ms

Clinical Notes

Patient presents for quarterly visit. Caregiver reports increased agitation and two episodes of dizziness in the past week. Non-smoker. Denies alcohol. Currently on Metformin 500mg, Lisinopril 10mg, Alendronate 70mg weekly, and Donepezil 5mg. Heart rate at 95 BPM is mildly elevated — dizziness episodes may be related. Blood pressure at 142/90 mmHg meets Stage 2 hypertension threshold — urgent medication review warranted. SpO2 at 93% is in the concerning range — patient reports mild shortness of breath on exertion. Temperature at 100.1°F indicates low-grade fever. Glucose at 162 mg/dL is above target — Metformin efficacy to be reviewed. HRV at 36 ms is significantly depressed — consistent with cardiovascular stress. Cognitive function slightly below February baseline.

Provider Notes

Blood pressure elevation is primary concern — Lisinopril dose increased to 20mg daily effective immediately. Caregiver instructed to monitor BP daily using home cuff. If BP exceeds 160/100 or patient experiences chest pain, call 911. SpO2 monitoring recommended at home. Endocrinology referral placed for glucose management review. Neurology notified of cognitive fluctuation — appointment scheduled. Recheck in 3 weeks. Ordering Provider: Dr. Priya Subramaniam, MD. Facility: BioSync Clinical Health Center
