

BIOSYNC CLINICAL LABORATORY REPORT — URGENT

Patient: Margaret T. Chen (DOB: 03/14/1942) | Date: April 28, 2026

Vital Signs & Biometric Readings

Heart Rate	112 BPM
Blood Pressure	176/114 mmHg
SpO2	89%
Temperature	101.8°F
Glucose	286 mg/dL
Weight	122 lbs
BMI	23.1
HRV	22 ms

Clinical Notes

Patient brought in by caregiver Linda Chen via emergency visit. Patient presented with acute confusion, labored breathing, and inability to recognize family members. Non-smoker. Denies alcohol. Currently on Metformin 500mg, Lisinopril 20mg, Alendronate 70mg weekly, Donepezil 5mg. Heart rate at 112 BPM — tachycardia present. Patient in visible distress. Blood pressure at 176/114 mmHg meets hypertensive crisis criteria despite increased Lisinopril dose — IV antihypertensive initiated immediately. SpO2 at 89% is critically low — supplemental oxygen applied at 4L/min. Respiratory rate elevated. Temperature at 101.8°F indicates significant fever — sepsis screen ordered. Glucose at 286 mg/dL critically elevated — insulin correction protocol initiated. HRV at 22 ms severely depressed — consistent with acute medical crisis. Acute cognitive decline noted — significant departure from baseline. Neurology emergency consult placed.

Provider Notes

Patient admitted to medical unit for emergency observation and stabilization. Cardiology, neurology, and endocrinology all consulted. Continuous cardiac monitoring in place. IV fluids and antihypertensives running. Oxygen therapy ongoing — respiratory team monitoring. Insulin drip initiated for glucose correction. Sepsis workup in progress — blood cultures drawn. Caregiver Linda Chen present and updated on critical status. Family notified. Patient condition serious but stable at time of report. Full neurological assessment pending. Ordering Provider: Dr. Priya Subramaniam, MD — URGENT. Facility: BioSync Clinical Health Center — Emergency Dept
