Clinical Notes

Patient presents for follow-up visit following January concerning report. Caregiver reports improvement in fatigue and cognitive clarity over past month. Non-smoker. Denies alcohol. Currently on Metformin 500mg, Lisinopril 10mg, Alendronate 70mg weekly, and Donepezil 5mg. Heart rate at 71 BPM is within normal range — sleep has improved per caregiver. Blood pressure at 126/80 mmHg is much improved from January visit — Lisinopril therapy effective. SpO2 at 96% is normal. Temperature 98.6°F is normal — fever fully resolved. Glucose at 109 mg/dL trending toward target — dietary modifications showing effect. HRV at 50 ms improved from 41 ms last visit. Cognitive function returned to prior baseline.

Provider Notes

Patient recovering well from January episode. Continue current medication regimen unchanged. Dietary modifications working — reinforce low-sodium and low-glycemic eating plan with caregiver. Alendronate and Donepezil therapy ongoing. Next routine quarterly follow-up in March. Caregiver Linda Chen updated — care plan remains stable. Ordering Provider: Dr. Priya Subramaniam, MD. Facility: BioSync Clinical Health Center
