

BIOSYNC CLINICAL LABORATORY REPORT

Patient: Sarah Ayres (DOB: 11/08/2000) | **Date:** April 19, 2026

Vital Signs & Biometric Readings

Heart Rate	108 BPM
Blood Pressure	134/83 mmHg
SpO2	93%
Temperature	99.8°F
Glucose	152 mg/dL
Weight	265 lbs
BMI	42.8
HRV	38 ms

Clinical Notes

Patient presents with complaints of mild fatigue and occasional shortness of breath over the past two weeks. Non-smoker. Occasional alcohol consumption reported. No current medications. No prior surgeries. Resting heart rate elevated at 108 BPM — consistent with mild tachycardia. Patient reports increased stress at work. Blood pressure reading of 134/83 mmHg indicates Hypertension Stage 1. Monitoring recommended. Oxygen saturation at 93% is in the concerning range. Patient reports mild congestion. Fasting glucose at 152 mg/dL is borderline — dietary review recommended. Family history of diabetes noted. Temperature at 99.8°F suggests a slight fever. HRV at 38 ms is below average — indicative of elevated stress or early autonomic dysfunction.

Provider Notes

Given elevated blood pressure and borderline glucose, lifestyle modification counseling initiated. Low-sodium diet and 150 minutes of moderate exercise per week advised. Repeat labs in 6 weeks. Monitor blood pressure at home. Consider referral to endocrinology if glucose remains elevated at follow-up. Family history of hypertension and diabetes elevates patient risk profile.

Proactive management advised. Ordering Provider: Dr. James Henderson, MD. Facility: BioSync Clinical Health Center
