

BIOSYNC CLINICAL LABORATORY REPORT

Patient: Harold J. Kowalski (DOB: 11/30/1955) | Date: January 28, 2026

Vital Signs & Biometric Readings

Heart Rate	88 BPM
Blood Pressure	146/93 mmHg
SpO2	94%
Temperature	98.9°F
Glucose	168 mg/dL
Weight	201 lbs
BMI	28.8
HRV	33 ms

Clinical Notes

Patient presents with complaints of ankle swelling, exertional shortness of breath, and increased fatigue over 2 weeks. Codeine allergy documented — not administered. Currently on Metoprolol succinate 25mg, Atorvastatin 40mg, Metformin 1000mg twice daily, Omeprazole 20mg, Allopurinol 100mg, Aspirin 81mg. Heart rate 88 BPM — elevated above Metoprolol-controlled baseline, concerning for breakthrough. Blood pressure 146/93 mmHg — Stage 2 hypertension, medication review required. SpO2 94% — decreased, monitoring closely given CAD history. Glucose 168 mg/dL significantly elevated — patient admits dietary non-compliance over holidays. Weight up 3 lbs. HRV 33 ms — depressed, cardiovascular stress. Bilateral pitting edema noted on exam — fluid retention concern. BNP ordered to evaluate for heart failure.

Provider Notes

Fluid retention and exertional dyspnea in post-MI patient requires urgent evaluation. BNP elevated at 310 pg/mL — early heart failure decompensation possible. Furosemide 20mg daily added temporarily for diuresis. Metoprolol increased to 50mg. Daily weight monitoring instructed — if weight increases more than 2 lbs in 24 hours, call office immediately. Sodium restriction reinforced strictly. Glucose management counseling provided — refer to endocrinology. Echocardiogram expedited — scheduled within 2 weeks. Follow-up in 1 week. Ordering Provider: Dr. Thomas Brewer, MD — Cardiology. Facility: BioSync Clinical Health Center
