

BIOSYNC CLINICAL LABORATORY REPORT

Patient: Harold J. Kowalski (DOB: 11/30/1955) | Date: February 25, 2026

Vital Signs & Biometric Readings

Heart Rate	68 BPM
Blood Pressure	130/82 mmHg
SpO2	96%
Temperature	98.5°F
Glucose	131 mg/dL
Weight	197 lbs
BMI	28.2
HRV	46 ms

Clinical Notes

Patient presents for follow-up after January concerning visit. Ankle edema resolved. Shortness of breath significantly improved. Patient reporting compliance with strict sodium restriction and daily weight monitoring. Currently on Metoprolol succinate 50mg, Atorvastatin 40mg, Metformin 1000mg twice daily, Omeprazole 20mg, Allopurinol 100mg, Aspirin 81mg, Furosemide 20mg (temporary). Heart rate 68 BPM — well controlled on increased Metoprolol. Blood pressure 130/82 mmHg — improved significantly. SpO2 96% — back to baseline. Glucose 131 mg/dL improving with dietary compliance. Weight decreased 4 lbs with diuresis. HRV 46 ms — improved from 33 ms last visit. Echocardiogram results: EF 48%, mild LV dysfunction noted — monitoring closely. No gout flare. GERD stable.

Provider Notes

Decompensation episode resolved with diuresis and Metoprolol uptitration. Furosemide to be continued for 2 more weeks then reassessed. EF of 48% warrants close monitoring — consider adding ACE inhibitor at next visit if EF does not improve. Continue all cardiac meds. Endocrinology follow-up confirmed for glucose management. LDL result: 58 mg/dL — at target. Patient doing well overall — reinforce dietary compliance. Follow-up echocardiogram in 3 months. Ordering Provider: Dr. Thomas Brewer, MD — Cardiology. Facility: BioSync Clinical Health Center
