

BIOSYNC CLINICAL LABORATORY REPORT

Patient: Jordan Riley (DOB: 04/11/2003) | Date: March 24, 2026

Vital Signs & Biometric Readings

Heart Rate	101 BPM
Blood Pressure	132/86 mmHg
SpO2	94%
Temperature	100.8°F
Glucose	97 mg/dL
Weight	124 lbs
BMI	20.6
HRV	37 ms

Clinical Notes

Patient presents with recurrence of fatigue, joint swelling in bilateral wrists, and new onset chest tightness — pleuritis suspected. Currently on Hydroxychloroquine 200mg twice daily, Methotrexate 15mg weekly, Prednisone 5mg daily (fully tapered), Sertraline 50mg, Ferrous Sulfate 325mg. Heart rate 101 BPM — tachycardia, likely inflammatory. Blood pressure 132/86 mmHg — elevated, monitoring required. SpO2 94% — concerning given chest tightness, pleuritis workup initiated. Temperature 100.8°F — low grade fever, inflammatory. HRV 37 ms significantly depressed. Weight continuing to decline — 3 lbs lost over 3 months, nutritional review needed. Anxiety significantly worsened — patient reports panic attacks twice this week.

Provider Notes

Second flare in 3 months raises concern for inadequate disease control. Prednisone increased to 15mg immediately. Chest X-ray ordered to rule out pleuritis and pericarditis. Cardiology referral placed. Rheumatology requesting Belimumab (biologic) evaluation — patient referred for specialist review. Sertraline increased to 75mg for worsening anxiety and panic attacks. Nutritional counseling referral placed. Anti-dsDNA, C3, C4 complement ordered. Recheck in 2 weeks. Ordering Provider: Dr. Sandra Okeke, MD — Rheumatology. Facility: BioSync Clinical Health Center
