

BIOSYNC CLINICAL LABORATORY REPORT

Patient: Terrence L. Bouchard (DOB: 07/22/1976) | Date: April 2, 2026

Vital Signs & Biometric Readings

Heart Rate	91 BPM
Blood Pressure	144/92 mmHg
SpO2	94%
Temperature	100.4°F
Glucose	118 mg/dL
Weight	180 lbs
BMI	27.1
HRV	34 ms

Clinical Notes

Patient presents ahead of scheduled visit reporting 2 weeks of fatigue, night sweats, oral thrush, and weight gain. Adhesive tape allergy — wound dressing adjusted. Currently on Biktarvy 1 tablet daily, Escitalopram 30mg daily, Rosuvastatin 10mg nightly. Patient admits missing 6-7 Biktarvy doses over past month due to depressive relapse. Heart rate 91 BPM — elevated. Blood pressure 144/92 mmHg — Stage 2 hypertension returning. SpO2 94% — decreased. Temperature 100.4°F — fever. Oral candidiasis confirmed on exam — opportunistic infection indicating immune suppression. Weight 180 lbs — up 4 lbs, mostly fluid. HRV 34 ms — depressed. PHQ-9: 16 — moderate-severe depression. Viral load recheck STAT ordered — ART non-adherence is critical concern.

Provider Notes

ART non-adherence with confirmed opportunistic infection (oral thrush) — urgent intervention. Fluconazole 150mg single dose for candidiasis. Biktarvy adherence counseling — adherence support program enrolled. Viral load STAT: 2,840 copies/mL — detectable, resistance testing ordered. Psychiatry urgent referral — depression driving non-adherence. Escitalopram increased to 40mg. Antihypertensive initiated: Amlodipine 5mg. CD4 count: 312 — decreased from 682, PCP prophylaxis with Dapsone started (sulfa allergy — TMP-SMX avoided). Partner James Bouchard included in care plan discussion with patient consent. Recheck in 1 week. Ordering Provider: Dr. Michelle Tran, MD — Infectious Disease. Facility: BioSync Clinical Health Center
