

BIOSYNC CLINICAL LABORATORY REPORT

Patient: Terrence L. Bouchard (DOB: 07/22/1976) | Date: January 29, 2026

Vital Signs & Biometric Readings

Heart Rate	86 BPM
Blood Pressure	136/86 mmHg
SpO2	95%
Temperature	99.6°F
Glucose	108 mg/dL
Weight	178 lbs
BMI	26.8
HRV	41 ms

Clinical Notes

Patient presents reporting worsening depression, insomnia, and fatigue over past 3 weeks. Reports high work stress and relationship difficulties. Sulfa drug allergy documented. Currently on Biktarvy 1 tablet daily, Escitalopram 20mg daily, Rosuvastatin 10mg nightly. Heart rate 86 BPM — mildly elevated, likely anxiety-related. Blood pressure 136/86 mmHg — Stage 1 hypertension, new finding — monitoring initiated. SpO2 95% — mild decrease. Temperature 99.6°F — low grade, viral illness possible. Glucose 108 mg/dL — borderline fasting. Weight 178 lbs — up 2 lbs. HRV 41 ms — decreased from baseline 59, consistent with psychological stress. PHQ-9 score: 14 — moderate depression, significant deterioration from December score of 6. Patient denies suicidal ideation. Sleep 3-4 hours per night reported.

Provider Notes

Depression significantly worsened — Escitalopram increased to 30mg. Referral to therapist placed — CBT recommended. Patient counseled on sleep hygiene and stress reduction. New hypertension finding — recheck in 4 weeks to confirm. If persistent, initiate antihypertensive. Biktarvy adherence verified — no missed doses. Viral load recheck scheduled in 6 weeks given immune stress from depression. Glucose borderline — dietary review provided. Patient given crisis line number and instructed to call if mood worsens or thoughts of self-harm arise. Follow-up in 3 weeks. Ordering Provider: Dr. Michelle Tran, MD — Infectious Disease. Facility: BioSync Clinical Health Center
