

BIOSYNC CLINICAL LABORATORY REPORT

Patient: Terrence L. Bouchard (DOB: 07/22/1976) | Date: February 26, 2026

Vital Signs & Biometric Readings

Heart Rate	72 BPM
Blood Pressure	126/80 mmHg
SpO2	97%
Temperature	98.4°F
Glucose	99 mg/dL
Weight	176 lbs
BMI	26.5
HRV	55 ms

Clinical Notes

Patient presents for follow-up. Reports meaningful improvement in mood, energy, and sleep since Escitalopram dose increase. Attending therapy sessions weekly — finding beneficial. Currently on Biktarvy 1 tablet daily, Escitalopram 30mg daily, Rosuvastatin 10mg nightly. Heart rate 72 BPM — returned to baseline. Blood pressure 126/80 mmHg — improved, hypertension resolved without medication. SpO2 97% — normal. Temperature normal. Glucose 99 mg/dL — normal fasting. Weight 176 lbs — back to baseline. HRV 55 ms — significantly improved from 41 ms last visit. PHQ-9 score: 8 — mild depression, improved from moderate. Sleep now 6-7 hours per night. Viral load recheck: still undetectable — immune system not impacted by depressive episode.

Provider Notes

Excellent response to Escitalopram dose increase and therapy. Continue Escitalopram 30mg. Therapy to continue — patient engaged. Blood pressure normalized — no medication needed at this time. Monitor at each visit. HIV remains fully suppressed — excellent. Rosuvastatin continued — next lipid panel in 6 months. Reinforce healthy lifestyle: regular exercise, limited alcohol, sleep routine. PHQ-9 to be repeated monthly. Patient has James Bouchard (partner) as support system — positive prognostic factor. Follow-up in 4 months standard HIV schedule — sooner if mood worsens. Ordering Provider: Dr. Michelle Tran, MD — Infectious Disease. Facility: BioSync Clinical Health Center
